

White Paper

# About us

## Token Utility

We are working with the First Japanese coin listing site "JPToken". (<https://jptoken.info>) As a result, 5% to 10% of JPToken's advertising expenses will be repurchased to JP every time development costs. It is a mechanism that is said. It's not just a cryptocurrency. It is more than a token design.

## Skillshare Marketplace

JP Skillshare Marketplace is a skill market where you can easily buy and sell individual skills from business to private use. All services are provided online. When purchasing and selling, you can settle your accounts in cryptocurrency. It is safe because JP mediates.

## Cryptocurrency News Sites

It provides not only the latest news from overseas, but also high-quality information on blockchain-related technologies. You can get a good balance of cryptocurrency-related knowledge from the basics to the latest information.

## Focus on development.

Start developing the next generation of useful cryptography.

## We value the holder.

We value all the holders. We will hold events as much as possible so that we can give back.

# TokenMetrics

JP is designed with long-term value creation in mind. We believe that building great things right takes time, and success requires a long-term commitment from your team. This is reflected in the following tokenomics:

Network  
Binance Smart Chain(BSC)

Total Supply  
3,000,000,000

TAX  
3%(LP 1%, Marketing 1%, Team1%)

Contract Address

# Cryptocurrency News Sites

---

<https://cryptonewsjp.xyz/>

It is a cryptocurrency media that covers a wide range of content, from important breaking news to original and highly specialized news. You can check the market information in a ranking format, and it is explained in an easy-to-understand manner even for beginners.

# Skillshare Marketplace

From business to private use, it is a skill market where you can easily buy and sell individual skills. Settlement can be done in virtual currency.

## 『List a service』

# The Future of JP

JP is a token that is designed with long-term value creation in mind. We will always develop what is necessary for the world according to the evolution of the times. We will proceed according to the set Roadmap, but on the way to it we may add new things. JP does not stop evolving.

# KYC AND AUDITING

## **KYC Description**

It's a process of identity verification to verify that you really who you are. The identity of the project owner is determined by submitting an ID document (passport, national ID) to an automated platform.

## **How does it work?**

The KYC process aims to eliminate fraud and lag pulls from the platform by acting as a deterrent to suspicious developers. If one of the project's team members scammed an investor: Their true identities will be revealed. This information will be made public for those who wish to file criminal charges.

## **Audit description**

The token project is verified to be true. The process of token verification.

## **How does it work?**

Examining the contents of tokens in blockchain-based systems increases security.

**(JP has KYC and AUDIT.)**

# PARTNERSHIP

**JP is in partnership with First Japanese coin listing site "JPToken".  
Partnerships make the most of each other.**

## Advantages of JP

JP is a low TAX so that anyone can easily enter. Tax 3% (Liquidity 1%, Team 1%, Marketing 1%) Advertising expenses from JPToken are returned by 5% to 10% each time. This can cover repurchases, development costs, and event costs. Sales of the matching platform can also be covered as new development costs.

## Advantages of the listing site JPToken

JPToken's customers are worried about marketing and technology. By using the matching platform developed by JP You can solve your customers' problems. Game engineer, NFT artist, influencer If you are looking for such, you can look for it on the JP's platform.
